The Napoleon Mine, 1907, contains iron ore in the Slide Mt Terrain.
Clayton, 1910
An extensive area of these clay deposits occurs at Clayton in sec. 19, T. 29 K, R. 42 E., and are owned by the Washington Brick, Lime and Sewer Pipe Company.
The Red Marble Mine, 1916

Magnesite played a big part in US Steel production during WWI and WWII.

Trainload of magnesite leaving the quarry of the American Mineral Production Company.

1916 - Red Marble Quarry developed to supply Magnesite for refractory brick as part of the war effort.
The Midnight Uranium Mine is now a Superfund site.
Sherwood Uranium Mine

Current picture after “Reclamation”
Northwest Alloys, 1976-2001

- Alcoa Inc. today announced that it will shut down Northwest Alloys, its magnesium smelter in Addy, Washington, as of October 1, 2001 due to high production costs and unfavorable market conditions.

- Northwest Alloys' planned operating rate in 2001 has been 30,000 metric tons per year (mtpy); total capacity is 45,000 mtpy. The plant employs 325 people. Approximately 300 workers will be laid off between October 1 and December 31, 2001.
